

USDT BANK EXECUTIVE TRAINING SESSION

INTRODUCTION

The inaugural session of the USDT Bank Executive Session immersed participants in the intricacies of chart analysis, laying the groundwork for informed trading decisions. This intensive training covered essential concepts, tools, and techniques to navigate the dynamic Forex landscape.

CURRENCY PAIRS AND CHART ANALYSIS

- Base and Quote Currencies: Understand the structure of currency pairs (e.g., EUR/USDT), recognizing the base currency (EUR) and quote currency (USDT).
- Chart Time Frames: Analyze price movements on various time frames (4h, 1h, 15m, 5m) to grasp market trends.
- Candlestick Components: Identify and label wicks, bodies, open, and close prices to decipher market sentiment.

FRACTAL PRICE AND TRADING VIEW

- Fractal Price Concept: Understand how sudden price movements impact trading strategies.
- Trading View Platform: Master utilizing Trading View for real-time data analysis, visualization, and informed decision-making.

CANDLE RANGE AND FAIR VALUE GAP (FVG)

- Candle Range: Comprehend every candle represents a range of price movements.
- Fair Value Gap (FVG): Identify and mark FVG on charts to pinpoint potential support/resistance levels.

KEY TAKEAWAYS

By the end of Day 1, participants acquired practical skills in:

1. Chart analysis and pattern recognition
2. Currency pair structure and market sentiment
3. Utilizing Trading View for data analysis
4. Identifying Fair Value Gap (FVG) for informed trading decisions

CONCLUSION

The USDT Bank Executive session provided a comprehensive foundation in chart analysis, empowering participants to navigate the Forex market with confidence. Building on this knowledge, future sessions will delve deeper into advanced trading strategies and techniques
